The Power of Blue.[®]

Wind Tunnel Technology™ protects electrical components and PC boards from contamination.

Fan-On-Demand™ cooling system operates only when needed, reducing noise, energy use and the amount of contaminants pulled through machine.

Lift-Arc™ allows TIG starting without the use of high-frequency. Starts the arc without contaminating the weld with tungsten.

Adaptive Hot Start™ increases the output amperage at the start of a weld if necessary, eliminating electrode sticking.

Lightweight, aerospace-grade aluminum case offers protection with the benefit of reduced weight.

Auto-Line™ Power Management Technology allows for any input voltage hook-up (208–460 V) with no manual linking required, providing convenience in any job setting. Ideal solution for dirty or unreliable input power.

Inverter arc control technology provides greater puddle control for superior 6010 Stick electrode performance, and outstanding MIG weld performance.

Process selector switch reduces the number of control setup combinations without reducing any features.

XMT 425 CC/CV

XMT 425 VS

The XMT 425 Series is packed with features to meet the most demanding welding needs.

Line voltage compensation keeps welding output constant even if input power varies by +/-10%. XMT 425 models further expand line voltage compensation on 460 VAC to an amazing +37%, -59%.

Large, dual digital meters are easy to view and are presettable to ease setting weld output.

Exceptional electrical efficiency. At 400 A, efficiency is 87.24%!

350 A of welding output at 60% duty cycle with superior low-end performance.

Power factor of .95 enables smaller fuses/breakers and primary wiring. Primary amperage draw at rated output is 25% less than the competition.

Ultra-tough, polycarbonate-blended cover for control panel protects front controls from damage.

Low OCV Stick — A built-in, selectable feature, that reduces the Stick mode open-circuit voltage (OCV) to nearly 15 volts when the welding power source is not in use. Eliminates the need for add-on voltage reducers.

Dinse International-style weld disconnects provide high-quality weld cable connections.

Additional Features for XMT 425 CC/CV

Auto Remote Sense™ enables unit to automatically use remote control if connected to remote control receptacle.

115 VAC auxiliary power provides 10 amps of circuit-breaker-protected power for water circulators. Available on CE model.

Pulsed MIG (GMAW-P) capabilities with optional Optima™ control reduces spatter and distortion, allows better out-of-position puddle control, and provides potential reduction of fume particle emission.

Power source is warranted for 3 years, parts and labor.
Original main power rectified parts are warranted for 5 years.
Gun warranted for 90 days, parts and labor.
