

LB5300E HAND BLOWER

Powered by a high-efficiency brushless motor, the EGO Power+ blower features jet turbine technology and large diameter tube to give maximum airflow. With a variable speed function design to keep you in control, it also features a Turbo Boost mode capable of putting out 900m³ of air per hour. More than most hand-held petrol blowers on the market, that's enough power to clear up even the biggest windfall.
