

Antifreeze Coolant

Blue ARC antifreeze coolant, for use in water coolers during TIG, MIG & Spot welding processes.

Formulated especially for use in systems where high frequency current is used. Protects from freezing to -15°C.

- For use with TIG, MIG and Spot welding processes
- All weather protection
- Low conductivity
- Protects from freezing to -15°C.
- Antifreeze Coolant to be mixed 50 : 50 with water
